

# Panel Blinds

Ultra modern and aesthetically stunning, our Glissade Panel Glide System by Uniline is a patented system of sliding fabric panels that can be fitted to any size sliding door, or used as a room divider.

The panels can be either face fit or taken right up to ceiling height, well above the sliding door. This creates the illusion of much higher ceilings.

Lightweight and easy to operate the Glissade panels open and close with a metal wand, allowing quick access to a door or section of room.

Regardless of how many panels are needed to cover an expanse, the Glissade system has a single track profile. The oversized fabric panels reflect the current trend for minimal window treatments.

The panels are available in various widths and the fabric choices are vast, allowing you to reflect your individual taste and style. Options available include translucent or blockout fabrics both with plenty of textures, patterns, colours and weaves to choose from.

Glissade offers minimal light penetration via panel overlap and minimal track spacing along with robust tracking and sliding rails that ensure a long life of quiet, fuss-free operation.

## Glissade Panel Blinds – Beautiful Versatility Ideal for large expanses of glass.

- Australian Design Award Finalist.
- Engineered for smooth and noiseless operation.
- Minimal track spacing means reduced light penetration.
- Extensive range of fabrics, colours, textures, patterns and designs.
- Various choices of panel widths.
- Can be fitted as a window furnishing or room divider.
- Sturdy, rust-resistant aluminium tracking and sliding rails.
- 3-6 track options with optional pelmet.
