

Roman Blinds

A Roman Blind is essentially a series of fabric panels that allow full window cover when lowered.

When raised the fabric neatly folds allowing full visibility through the window. Ideal for long summer days and great for capturing the low winter sun.

Our Roman Blinds are available with or without front battens. The battens are positioned without the need for unsightly staples or stitches, resulting in a quality finish.

The choice of fabrics will amaze you – first decide if you want translucent fabric to filter natural light and retain privacy, or a blackout to keep the heat in, helping you to lower your heating costs in winter. Then choose from a vast range of textured, coloured and patterned fabrics.

Thanks to a chain-driven mechanism, the blinds lift effortlessly, even for larger blinds weighing up to 8kg!

A self-guiding spool greatly reduces the risk of tangled cords, ensuring the blinds are raised and lowered evenly without skewing.

Child Safe options are available. Read more about these at www.livingcolourdesign.co.nz

A Roman Blind is the ultimate designer statement in soft furnishings.

- Easy to use and offers excellent light control.
- Creates a lovely decorative impact of soft furnishings
- Extensive range of fabrics, colours, textures, patterns and designs.
- Chain mechanisms allow for minimum effort to lift blinds up to 8kg!
