

# Vertical Blinds

---

Vertical blinds are always elegant and dress windows with clean, uncluttered lines. Combine that with their practicality, they are ideal for sliding doors or large windows.

The blades of fabric are controlled by a chain mechanism or mono wand unit, allowing you to control the level of light and privacy for your home or office. Also adjustable is the degree of angle you position them to block out glare or keep in heat in.

The vertical blinds stack neatly away to the left, right or centre, allowing you to see the view fully.

Available in several slat widths there is also the option to have spacer chain links or to have them chainless with bottom weights to keep them sitting uniformly.

There are various fabric options including light filtering and blackout, patterned, textured and colours.

## Cutting edge design, smooth operation and insulation from the elements

- Wand or chain control options.
- Custom made to order.
- Easily cleaned with a damp cloth.
- Extensive range of fabrics, colours, textures, patterns and designs.
- Adjustments and ease of rotation allows full control of light levels and privacy.
- Perfect for allowing an unhindered view when stacked.
- Stackable to the left, right or centre.
